

MISSILE DEFENSE AGENCY ENVIRONMENTAL POLICY

We must do our part
to take care of what we
work so hard to defend.

May 17, 2013

The Missile Defense Agency is committed to continual improvement of its Environmental Program; in accordance with MDA Directive 4700.01, Environmental Management Program. The MDA will strive to integrate environmental requirements into systems engineering processes and long-term planning to minimize the lifecycle environmental impacts of the Ballistic Missile Defense System (BMDS).

WE ACCOMPLISH OUR MISSION BY:

- ▶ Complying with statutory and regulatory environmental requirements.
- ▶ Pursuing pollution prevention as the preferred means of meeting existing or emerging environmental requirements.
- ▶ Establishing and updating environmental objectives and targets.
- ▶ Using "green" procurement and technologies where practical to efficiently conserve resources over the BMDS lifecycle.
- ▶ Conserving and sustaining cultural and natural resources at host test ranges, installations, and facilities.
- ▶ Providing MDA personnel and contractors environmental awareness training and recognizing and rewarding outstanding environmental stewardship.

If you have any comments, concerns, or suggestions about environmental management at the Missile Defense Agency, please e-mail: envgrp@mda.mil
