MISSION

We facilitate access to ingenuity residing within the small business industrial base the Missile Defense Agency (MDA) relies on for missile defense.

VISION

We strive to remain an integral player and valued advisor to the workforce developing and implementing acquisition strategies supporting MDA's foundation for missile defense, while effectively advocating for use of small businesses in our procurements.

The MISSION of the MISSILE DEFENSE AGENCY

The Missile Defense Agency’s (MDA) mission is to develop and deploy a layered Missile Defense System to defend the United States, its deployed forces, allies, and friends from missile attacks in all phases of flight.
Mr. Jerrol Sullivan, Acting Director

As the Missile Defense Agency continues to develop and deploy a layered Missile Defense System to defend the United States, its deployed forces, allies, and friends from missile attacks in all phases of flight, we have refined our MDA OSBP strategic objectives. Our refined objectives directly align with the following Agency’s foundations for missile defense:

1) Operations and Readiness
2) Production and Fielding
3) Development and Technology

Supporting these foundations will be pivotal in all we do as small business professionals striving to add value to the mission and all Agency acquisitions in support of delivering capability to the warfighter. If you are reading this newsletter, you are probably an internal or external customer. Customer focus is a top priority for us so we want to hear from you to ensure we are meeting needs that enable the business community to support us in accomplishing our mission.

The Office of Small Business Programs 

WELCOMES

Ms. Ketura Collier, Small Business Office Media Analyst

The Office of Small Business Programs welcomes Ketura Collier as a support contractor from our C3PO contract. Ketura will be working with Cheryl Michael in supporting the outreach program, website management, email management and other support tasks.

Ketura Collier is a proactive and skilled Acquisition Analyst with over 13 years of professional experience in support of business management, contracting, finance, and accounting. Ketura is a native of Huntsville, Alabama. Ketura graduated from Huntsville High in 2000 and went on to Virginia College – Birmingham and Huntsville, Alabama to receive her Bachelors of Arts in Business Management (2006) and her Master’s Degree in Business Management (2008).

Ketura has been a government support contractor for the Director for Acquisition Policy and Support for the Missile Defense Agency on Redstone Arsenal, as well as a government support contractor for the Program Executive Office for Missiles and Space (PEO)—Cruise Missile Defense Agency (CMDS)—Business Management Directorate (BMD) at PEO.
Finding MDA Opportunities Using GSA eBuy

In addition to using SAM.gov to fulfill agency requirements MDA uses The U.S. General Services Administration (GSA) buyer tools. One way to discover MDA requirements is to use eBuy. MDA sources some products and services using The U.S. General Services Administration’s eBuy Tool.

The U.S. General Services Administration’s eBuy Tool

GSA eBuy (https://www.ebuy.gsa.gov/ebuy/) is the comprehensive and paperless request-for-quote (RFQ) system managed by the U.S. General Services Administration. Using the system, verified suppliers, including small businesses, can easily and efficiently connect and participate in the contracting process for a wide variety of commercial products (supplies) and services.

Companies interested in selling their products and services to the federal government should visit GSA’s How to Sell to the Government page (www.gsa.gov/buying-selling/purchasing-programs/gsa-schedule/selling-to-the-government).

Specific to small businesses, GSA has a group that provides access to nationwide procurement opportunities through outreach, training and counseling. Information for your local Small Business Specialist can be found at www.gsa.gov/contactgroup/small-business-support.

Federal government agencies or buyers can use eBuy to post RFQs for supplies and services. These buyers can also use eBuy to request information and to find sources to fulfill their requirements.

The following acquisition solutions are available on eBuy:

- **GSA Multiple Award Schedules (MAS)** – also referred to as Federal Supply Schedules
- **Technology contracts**
  - Government wide Acquisition Contracts (GWACs) – innovative, cost-effective solutions for Information Technology (IT) requirements.
Network Services and Telecommunications contracts – solutions for agency’s communications infrastructure and network needs.

• Blanket Purchase Agreements – GSA has developed several MAS BPAs that leverage the government’s buying power and achieve cost savings through the aggregating of federal demand.

• Federal Strategic Sourcing Initiative contracts – Strategic sourcing is the structured and collaborative process of critically analyzing an organization’s spending patterns to better leverage its purchasing power, reduce costs, and improve overall performance.

To participate in eBuy, contractors or sellers must already have a GSA contract and register their contract with the GSA Vendor Support Center (vsc.gsa.gov). Contractors must also post their MAS Catalog on GSA Advantage! The GSA Vendor Support Center (VSC) can provide additional information on these steps.

The VSC maintains a staff ready to assist vendors in the preparation and submission of electronic catalog files to GSA Advantage! Vendors may contact the VSC staff Monday-Friday, 8:30 a.m. – 5:30 p.m. Eastern Time at 877-495-4849 or via email at vendor.support@gsa.gov. Online information is available 24 hours a day, 7 days a week.

FAQs
Frequently Asked Questions

Q: Does the small business need a GSA Schedule to use eBuy?
A: Yes. Businesses must already have a Schedule contract to use eBuy. If they don’t have a Schedule visit https://vsc.gsa.gov/ and click on “I want a contract” at the top of the page.

Q: How long does it take to get a GSA Schedule?
A: Time frames (getting a new Schedule contract, signing up for eBuy) are determined by how fast or slow the business submits its documents. We don’t have concrete time frames that capture the entire process but plan on several months.

You can find out more and get help concerning your particular circumstances by contacting:

MDA CYBER ASSISTANCE TEAM

DEFEATING CYBERSECURITY THREATS THROUGH DIB PARTNERSHIPS

What is MDA’s Cyber Assistance Team (CAT)?
A partnership between MDA and its Defense Industrial Base (DIB) to defeat global cybersecurity threats through threat-based, holistic cybersecurity reviews and the development of tailored mitigation strategies.

- Provide tailored threat reviews and mitigations of individual DIB partners
- Review the cybersecurity posture of MDA DIB partners’ networks and IT infrastructure
- Leverage public data and Intelligence Community data to characterize cyber tactics, techniques, and procedures (TTPs) facing industry and BMDS related networks/systems
- Improve protection of Controlled Unclassified Information across MDA operational and DIB networks/systems

Why Participate in MDA CAT Assistance Visit?
Participation is beneficial to your company and MDA.

- Provides DIB partners insight into vulnerabilities associated with their networks/systems with recommendations for mitigation
- Identifies cyber threats to your business’ proprietary information and/or personnel
- Helps meet compliance with DFARS 252.204-7012 and NIST standards
- DIB data will remain private (no attribution) and will be protected via secure transmission and storage techniques
- It’s FREE and there is no retribution or attributions for observations or findings!

Be part of the solution:
Help MDA combat loss and theft of Controlled Unclassified Information and your Intellectual Property. Cybersecurity threats pose an immense, expanding threat to national security and to your bottom line. Help us identify and thwart the cyber adversaries. CAT cybersecurity partnerships are enduring and make a difference!

How to participate:
Contact the Cyber Assistance Team at MDACyberAssistanceTeam@mda.mil or at (256) 450-1003.

Outreach Program

PURPOSE
Engage the business community to gain insight necessary to develop and maintain a superior knowledge of the industrial market MDA relies on for missile defense; offer marketplace knowledge that can help identify potential sources and solutions capable of meeting MDA mission requirements.

KEYS TO WORKING WITH MDA

- Let us know your capabilities by visiting our office or website at www.mda.mil and adding your profile to our directory.
- Attend our conferences for matchmaking with primes and meeting with government representatives from MDA.
- Provide quality responses to our “sources sought” notices when we issue them.

We often make important acquisitions strategy decisions based on responses to sources sought.

HOW WE HELP YOU

- Our office is your advocacy office.
- We will help you understand the Agency and where your product or services might best fit.
- We can also provide contact information for the appropriate agency or major prime contractor personnel to further market your products or services.
- We ensure that all acquisitions are reviewed for participation by small businesses.
- The key to making sure an acquisition is set-aside for small business is our ability to demonstrate there are sufficient businesses capable of performing the job we need, in a quality manner, and at a reasonable price to meet our agency’s mission.

MDA MARKETPLACES

Support for Development, Production, Fielding and Sustainment of the BMDS

- Many subcontracting opportunities with our large system integrators.
  - For those interested in participating in this market, become familiar with the MDA Small Business Advocacy Council (SBAC). To learn more visit www.mda.mil and click on MDASBAC.

Advisory and Assistant Services (A&AS)

- TEAMS/TEAMS-Next Program
  - All A&AS services will be acquired through the TEAMS program.

- Stay engaged in the TEAMS-Next Program by registering for beta.SAM.gov announcements.

Infrastructure Support Services

- MDA Facilities and Information Technology (IT) support

SBIR/STTR

- MDA always participates in at least one solicitation issued by DoD Small Business Innovative Research (SBIR) or Small Business Technology Transfer (STTR) Programs.
**CHECKLIST**

**For Doing Business with MDA**

1. Meet with your local Procurement Technical Assistance Center (PTAC).
2. Identify your product or service by North American Industry Classification System (NAICS) Codes.
3. Confirm your small business size standards.
4. Determine if your business is eligible to participate in any Socio-Economic Program(s).
5. Obtain a Data Universal Numbering System (DUNS) number.
6. Register in the System for Award Management (SAM).
7. Become familiar with government contracting procedures.
8. Become familiar with MDA and how your company can help the Agency accomplish its mission.
10. Consider the GSA schedule program and other best-in-class contracts.
11. Explore subcontracting and joint venture/teaming opportunities.
12. Make an appointment to speak with the Office of Small Business Programs - your first and most important step for doing business with MDA.

**MAKE AN APPOINTMENT**

**Contact Information**

MDA Office of Small Business Programs  
Phone: 256-450-2872  
Email: outreach@mda.mil  
Website: [www.mda.mil](http://www.mda.mil)

**ON THE COVER**

The U.S. Missile Defense Agency conducted a successful launch of a Ground-Based Midcourse Defense (GMD) Ground Based Interceptor (GBI) flying a mock-up of the Exoatmospheric Kill Vehicle (EKV). This test was the first flight test of a three-stage booster operating in two-stage mode meaning the third stage was not ignited, allowing earlier release of the kill vehicle providing increased battlespace. This new capability is known as a 2-/3-Stage selectable GBI. This capability gives the warfighter greater flexibility in executing the defense of the homeland while significantly increasing the battlespace for successful threat engagement. Using a mock-up of an EKV provided a significant reduction in cost of the test and spared critical defense assets that were not required in this non-intercept test.

---

“**The MDA team is focused on designing, developing, delivering, and sustaining an advanced, fully integrated and layered missile defense system.”**

Jon A. Hill  
Vice Admiral, USN, Director, MDA

To achieve this focus the Agency relies on our large and small business contractors as they develop, test, integrate, and field the Missile Defense System (MDS) for MDA. This contractual relationship provides contracting opportunities in four major markets: MDS development, A&AS, Infrastructure Support Services and the Advanced Research Program.

MDA encourages teaming arrangements to meet these consolidated requirements set-aside for competition among small businesses. Set-asides require prime contractors to comply with DOD Class Deviation 2021-O0008 to Federal Acquisition Regulation (FAR) Clause 52.219-14, Limitations on Subcontracting for small businesses. DOD contracting officers are required to use the Class Deviation instead of the existing clause at FAR 52.219-14 when issuing solicitations and awarding contracts or task or delivery orders under Far Part 19 to small business concerns.

“Similarly situated entity,” as used in this clause, means a first-tier subcontractor, including an independent contractor, that has the same small business program status as that which qualified the prime contractor for the award; and is considered small for the NAICS code the prime contractor assigned to the subcontract the subcontractor will perform.

Calculation of the amount that can be subcontracted:

In the case of contracts for services (except construction), a small business shall not pay more than 50 percent of the amount paid to it by the Government to firms that are not similarly situated.

Please Note: This chart provides an update to Industry Day #2, slides 15 and 22, and it is consistent with information briefed at Industry Day #3 and current MDA plans. **This summary is provided for planning purposes only and all content, including NAICS codes, are subject to change prior to issuance of Final RFPs**
MDA encourages teaming arrangements to meet these consolidated requirements. Prime contractors are required to provide maximum practicable opportunities for small business concerns to participate in efficient performance of these contracts, as specified in Federal Acquisition Regulation (FAR) Clause 52.219-8.

Please Note: This chart provides an update to Industry Day #2, slides 15 and 22, and it is consistent with information briefed at Industry Day #3 and current MDA plans. **This summary is provided for planning purposes only and all content, including NAICS codes, are subject to change prior to issuance of Final RFPs**

Mentor-Protégé Program

About the PROGRAM

Mentor’s Eligibility
To be eligible to participate as a mentor, an entity must —
• Be eligible for the award of Federal contracts;
• Demonstrate that it—(i) is qualified to provide assistance that will contribute to the purpose of the Program; (ii) Is of good financial health and character; and (iii) Is not on a Federal list of debarred or suspended contractors;

Protégé’s Eligibility
A qualifying Protégé must be:
• One of the following:
  - A “nontraditional defense contractor”
  - A qualified HUBZone small business concern
  - A Woman-Owned Small Business (WOSB)
  - A Service-Disabled Veteran-Owned Small Business (SDVOSB)
  - Socio-economically disadvantaged small business
  - A qualified organization employing the severely disabled
  - An entity currently providing goods or services in the private sector critical to enhancing the capabilities of the defense supplier base and key to fulfilling key DoD needs
  - A business owned and controlled by an Indian tribe or Native Hawaiian organization
• Eligible for award of Federal contracts
• No more than the Small Business Administration (SBA) size of standard corresponding to primary NAICS

Steps for Participation
1. Identify a Mentor/Protégé counterpart. (Mentor and Protégé are solely responsible for finding their counterpart.)
2. Identify Agreement type
3. Contact MilDep/ODA (reimbursable) or DCMA (credit) & (credit-hybrid) for additional requirements
4. Conduct needs assessment (recommended)
5. Develop agreement
6. Submit agreement for approval
7. Agreement start
8. Comply with reporting and review requirements

BACKGROUND
The Mentor-Protégé Program was established in 1990 under section 831 of Public Law 101-510. This program was created in an effort to respond to concerns, raised by Department of Defense (DoD) prime contractors, that many Small Disadvantaged Businesses did not possess the technical capabilities to perform DoD subcontract requirements. The Mentor-Protégé Program is designed to provide incentives to major DoD contractors by:
• Furnishing technical and business assistance to small disadvantaged businesses, women-owned small businesses, service-disabled veteran-owned and controlled businesses, and qualified HUBZone small businesses
• Enhancing their capabilities to satisfy DoD and other contract and subcontract requirements
• Fostering the establishment of long-term business relationships that benefit the DoD
• Increasing protégé firms technical and business infrastructure capabilities to contract with the DoD or other Federal agencies
• Demonstrating benefits to the Warfighter through technology transfer

Current Status of the Program
• Direct reimbursement of costs and credit towards subcontracting goals may be incurred through September 30, 2026
• Be capable of imparting value to a protégé firm because of experience gained as a DoD contractor or through knowledge of general business operations and government contracting, as demonstrated by evidence of that such entity.
Types of AGREEMENTS

Reimbursement Agreements
- Identify specific contract vehicle/contracting officer endorsement
- Highly encouraged to use HBCU/MI/SBDC/PTAC
- Direct cost reimbursement of allowable costs outlined in Appendix I, including:
  - Direct labor costs (for assistance by Mentor firm employees)
  - Assistance provided by HBCU/MI/SBDC/PTAC
  - Other costs - detailed cost breakdown
- Military Services/Other Defense Agencies may have additional requirements
- Requires Military Services/Other Defense Agencies’ Approval

Credit Agreements
- Requires Defense Contract Management Agency approval
- More focused on business infrastructure
- Costs incurred under Credit Agreement - May be applied (in the following multiples) towards the SDB subcontracting goal under any Federal Agency Subcontracting plan (FAR 19.703):
  - 4x for assistance provided by HBCU/MI/SB
  - 3x for labor assistance by Mentor firm employees
  - 2x other costs (for example, travel or training)

Hybrid Agreements
- Utilizes some credit and some reimbursement instead of exclusively one or the other - Hybrid Agreements start out as a Credit Agreement for the first year and then can be modified to include Reimbursable Agreement provisions for remainder of the agreement
- Process:
  - Development procedures similar to a reimbursement
  - Agreement transformed to a form contract document signed by both parties
  - Proposal can be submitted to DCMA MP Program Manager (PM) and serving DoD Component PM for consideration
  - The base year (credit) amount must be commensurate with the reimbursable amounts for Option Year 1

Criteria for Agreement
- May not exceed 2 years
- Must have milestones
- Must have metrics
- Should show value to Mentor, Protégé, and DoD
- Estimated dollar amounts of subcontracts
- Detailed cost breakdown:
  - The total amount of reimbursed to a Mentor costs of assistance furnished to a Protégé in a fiscal year may not exceed $1M
  - The average cost of a 2-year, direct reimbursed agreement is $500,000-750,000 (for each of two years)

Mentor’s Benefits
- Develop long-term business relationships with SDB concerns
- Develop SDB subcontracting base
- Direct cost reimbursement and/or SDB credit
- Teaming opportunities with the Protégé to win new contracts and/or subcontracts
- Participation in the MP Program as a marketing tool
- Networking opportunities

Protégé’s Benefits
- Relevant technical assistance
- Participation in the MP Program as a marketing tool
- Networking opportunities
- Teaming opportunities with the Mentor to win new contracts and/or subcontracts

DoD/MDA Benefits
- Stimulate and transition innovative technologies into established Defense Acquisition programs
- Resolve operational challenges and other critical national security requirements
- Train and develop business acumen and capabilities of Protégés
- Provides new development and technical assistance to Protégés for potential business opportunities with DoD agencies

Redstone Arsenal, AL 35898

For More Information:
MPP@mda.mil
http://business.defense.gov/Programs/mentor-protege-program/
The Department’s pilot Mentor-Protégé Program (MPP) was established November 5, 1990 (Public Law 101-510) in an effort to respond to concerns raised by DoD prime contractors that many Small Disadvantaged Businesses did not possess the technical capabilities to perform DoD subcontract requirements, making it difficult for these prime contractors to achieve their SDB subcontracting goals.

**MPP Program Updates:**

- Direct reimbursement of costs and credit towards subcontracting goals maybe incurred through **September 30, 2026**
- Accepting NEW MPP agreements through September 2024
- Agreement length changed from three to two years
- Modification on Disadvantaged Small Business Concern size standard (less than half the size of primary NAICS to no more than size of standard corresponding to primary NAICS)
The Missile Defense Agency (MDA) has available test time for Heavy Ion (HI) Single Event Effects (SEE) characterization of electronic piece parts in the Natural Space Environment (NSE) at the NASA Space Radiation Laboratory (NSRL) and Lawrence Berkeley National Laboratory (LBNL) over the course of the next five (5) years.

MDA’s mission requires the synchronized integration of platforms, sensors, and other components of the Missile Defense System (MDS), which were, or are, under separate development by multiple contractors. MDA uses the concept of End-to-End performance to serve as the organizing principle that aligns and synchronizes these efforts to achieve the desired operational end-state for the MDS. Further, the MDA mission relies on a robust industrial base for the critical supply, at scale, of parts approved for use in a space environment. In support of its mission, MDA plans to utilize a portion of this HI test time for the purpose of establishing a radiation parts database and preferred parts listing via testing of electronics parts identified as common, or potentially beneficial, to multiple components of the MDS. Additional information about MDA’s mission is available at www.MDA.mil.

MDA intends to make test time available to vendors whose candidate parts support the above initiative. MDA’s availability only extends to beam time. Vendor participants are responsible for all of the other necessary resources to undergo and complete testing to include the test team, part samples and test fixtures.

The foundation of the radiation parts database and preferred parts list, which ultimately contributes to a robust industrial base, is a standard test approach that will meet generic MDA ballistic missile needs while providing consistent data for comparison of parts in NSE across multiple potential applications. A SEE Characterization Requirements Document will establish the minimum testing expectations based on technology type that each part must adhere to.

Prospective applicants should be aware that the Government must have the requisite ability, short and long-term, to support parts’ continued development, future production, operation, maintenance, upgrade, and modification of such. This includes minimizing restrictions on Intellectual Property rights for the resulting final data, analysis, and test reports that impact MDA’s ability to maintain or certify changes to the tested configuration or MDA’s ability to conduct studies, material review boards, and major weapons systems parts selection efforts.

Interested vendors can email the MDA Heavy Ion Test Allocation Council (HITAC) at MDAHITACadmin@mda.mil. Upon receipt of the email, MDA will provide a full test application, to include the SEE Characterization Requirements Document mentioned above. Vendors who find the application and its attachments agreeable may submit an application accordingly.

MDA’s HITAC will review applications on a rolling basis; however, the timely submission of an application is paramount to the allocation of test time.

TODAY’S LAYERED MISSILE DEFENSE SYSTEM

C2BMC Command and Control, Battle Management, and Communications

The Command and Control, Battle Management, and Communications (C2BMC) program is the hub of the layered Missile Defense System. It is a vital operational system that enables the President, Secretary of Defense and Combatant Commanders at strategic, regional and operational levels to systematically plan missile defense operations, to collectively see the battle develop, and to dynamically manage designated networked sensors and weapons systems to achieve global and regional mission objectives.

THE SYSTEM OF ELEMENTS

SENSORS

An effective layered defense incorporates a wide-range of sensors to detect and track来袭 missiles through all phases of their trajectory. Land-based and sea-based radars provide worldwide sensor coverage.
